SECTION A: MAP WORK AND BASIC TECHNIQUES

Questions 1 to 12 are based on the 1:50 000 map extract of Glendale (Zimbabwe).

1 Find the six figure grid reference of the spot height 1126 South of Glendale staff quarters.

A 801 959
B 819 962
C 959 801
D 951 809

2 What is the vertical interval of the map of Glendale?

A 10 metres
B 20 metres
C 30 metres
D 40 metres

3 Name the hill that is on the South Eastern part of Glendale.

A Clifton
B Domboshawa
C Kasipa
D Virginia South

Study the climatic chart below and answer questions **24** and **25**.

24 Which statement is correct about the climatic data above? It...

A has relatively high temperature in summer.

B has relatively uniform temperature throughout the year.

C has very high rainfall throughout the year.

D most of the rains are received in summer.

25 What vegetation type best suits the climatic data being presented?

A Evergreen forests, palm trees and deciduous trees

B Evergreen oak, pine and wiry grass

C Scrub, drought resistant and cacti

D Tall grass, scattered trees and thorny bushes

26 The earth's atmosphere gets ...

A thicker as altitude increases.

B thicker as latitude decrease.

C thinner as altitude decreases.

D thinner as altitude increases.

27 Which of the following regions is the **poorest** in biodiversity?

A Equatorial

B Hot deserts

C Mediterranean

D Savanna

40 Dairy farming is usually practised near large city areas because …

A dairy products are perishable.
B grass is greener in urban areas.
C only urban areas are suitable for dairy animals.
D rural dwellers do not consume dairy products.

41 Which of the following crops are grown under shifting cultivation?

A Barley and millet
B Cassava and maize
C Sorghum and rice
D Wheat and ground nuts

42 Which one of the following describes extensive farming?

A Highly mechanised
B High use of draught power
C High use of human labour
D High yield per hectarage

43 Which one of the following is a geographical requirement for the successful growth of maize?

A Average rainfall of 650mm – 1000mm
B Average temperature of above 16°C
C Rich alluvial soils with an impoverished sub-soil
D Thick clay soil on gentle slope

goto zedpastpapers.com for more

44 A geologist prospecting and surveying for oil would most likely consider ...

A gently folded anticline strata.
B zones of igneous rocks.
C zones of impervious rocks.
D zones of metamorphic rocks.

45 For successful Hydro Electric Power development, the following factors are essential **except** ...

A convenient transport.
B large domestic market.
C sufficient volume of water.
D steep gradient.

46 The highest potential which Africa has on solar production is based on the abundance of ...

A forests.
B minerals.
C cloud cover.
D sunshine.

47 Which among the following countries is a major importer of coal?

A China
B India
C Japan
D Malaysia

48 What type of energy produced by human and animal waste is used for lighting, cooking and generating electricity?

A Biogas
B Ethanol
C Methane
D Petroleum

49 Which **one** of the following is **not** a fossil fuel?

A Biomass
B Coal
C Petroleum
D Uranium

50 What type of energy has propelled the success in manufacturing of valuable machinery, electrical appliances in Switzerland?

A Hydro-electric power
B Thermal power
C Nuclear power
D Geothermal power
